(54) Title: USE OF CORE/SHELL PARTICLES

(57) Abstract: The invention relates to the use of core/shell particles whose shell forms a matrix and whose core essentially consists of a degradable polymer and has an essentially monodisperse size distribution and whose shell can be pyrolysed to give a carbon matrix, for the production of mouldings having regularly arranged cavities, to a process for the production of mouldings having regularly arranged cavities, and to the corresponding mouldings.
